

### **Surface Grinding Machine**

The surface grinders are mainly used for grinding the surfaces and side-surfaces of various parts in machinery manufacture, small and medium batch production workshops. It is easy to operate the machine, which is reliable and widely applicable.

### **Technical specifications**

<b>Model:</b>		<b>SSGM7120</b>
Worktable size	mm	200x630
Max. Work piece size	mm	630x200x320
Max. work piece weigh	mm	158
Max. worktable travel	kg	780/730
Max. wheel head vertical travel	mm	345
Grinding wheel size	mm	Φ250x25xΦ75

## Surface Grinding Machine

The surface grinders are mainly used for grinding the surfaces and side-surfaces of various parts in machinery manufacture, small and medium batch production workshops. It is easy to operate the machine, which is reliable and widely applicable.

## Technical specifications

<b>Model:</b>		<b>SSGM7130</b>
Worktable size	mm	300x1000
Max. Workpiece size	mm	1000x300x400
Max. workpiece weight	Kg	500
Max. worktable travel	mm	1100
Max. wheel head vertical travel	mm	380
Grinding wheel size	mm	Φ350x40xΦ127

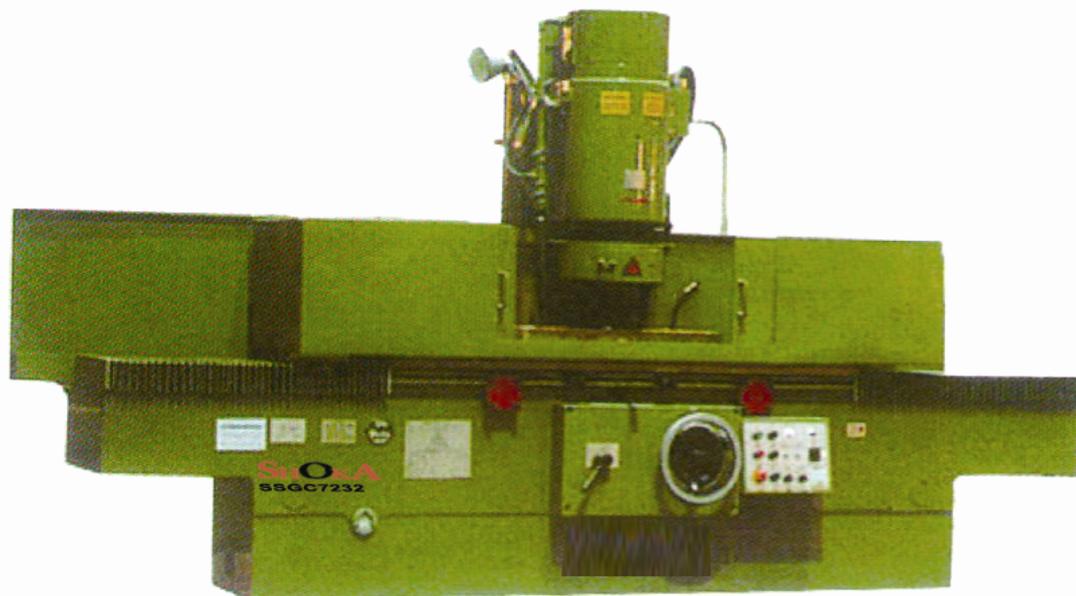

### Surface Grinding Machine

The surface grinders are mainly used for grinding the surfaces and side-surfaces of various parts in machinery manufacture, small and medium batch production workshops. It is easy to operate the machine, which is reliable and widely applicable.

### Technical specifications

Model:		SSGM7150
Worktable size	mm	500x2000/3000
Max. Work piece size	mm	2000/3000x500x600
Max. work piece weight	Kg	2000 / 2300
Max. worktable travel	mm	2200/3200
Max. wheel head vertical travel	mm	630
Grinding wheel size	mm	Φ500x100xΦ305

**Surface Grinding Machine**

The surface grinders are mainly used for grinding the surfaces and side-surfaces of various parts in machinery manufacture, small and medium batch production workshops. It is easy to operate the machine, which is reliable and widely applicable.

**Technical specifications**

<b>Model:</b>		<b>SSGM7232</b>
Worktable size	mm	320x1000
Max. Work piece size	mm	100x320x400
Max. work piece weight	Kg	600
Max. worktable travel	mm	1550
Max. wheel head vertical travel	mm	450
Grinding wheel size	mm	$\Phi$ 100x35x $\Phi$ 150
Segmental wheel size	mm	60/100x35x150 (8)

## Surface Grinding Machine

The surface grinders are mainly used for grinding the surfaces and side-surfaces of various parts in machinery manufacture, small and medium batch production workshops. It is easy to operate the machine, which is reliable and widely applicable.

## Technical specifications

Model:		SSGM7480	SSGM7475
Worktable diameter	mm	0800	0750
Max. height to be ground	mm	320	300
Max. workpiece weight	Kg	600	600
Wheel head spindle speed	rpm	1000	1000
Max. wheel head vertical travel	mm	400	380
Grinding wheel size	mm	Φ450x380xΦ150	Φ450x380xΦ150
